Specifications for Rebuilt Three-Axis CNC Gear Hobber

Machine Model: KASHIFUJI KS300

Control System: Siemens 808 Advanced System

Overview:

The Kashifuji KS300 Gear Hobber has undergone meticulous retrofitting, now equipped with the advanced Siemens 808 Advanced control system. Originating from a meticulously maintained factory, this machine ensures reliability and performance. With its robust construction and advanced control features, it stands ready for immediate operation. This particular machine boasts two guide ways, a feature that significantly enhances both machine rigidity and accuracy.

Technical Specifications:

- Maximum Cutting Diameter: 300mm
- Maximum Module: 8
- Maximum Cutting Tilt Angle: $\pm 45^\circ$
- Hob RPM: 400rpm
- Weight: 10 tons

Rebuilt Work Undertaken:

The machine has undergone comprehensive recontrol and recertification, adhering precisely to Kashifuji' s standards. The original old FANUC CNC system has been replaced with the Siemens

808 Advanced System. The refurbishment process includes:

- Thorough cleaning of all components of the machine.**
- Inspection and adjustment of moving slides, spindles, and parts handling systems**
- Replacement of worn-out components such as bearings, hoses, cables, connectors, filters, etc.**
- Installation and testing of all safety guarding**
- Verification of machine cycles through test cutting**
- The Main Bevels of the machine were replaced with BRAND NEW ones, manufactured on Gleason 104 CNC Bevel Gear Generator, followed by lapping for precision.**
